

# RIVER Xchange

This one-of-a kind project will provide a rich and multidisciplinary learning experience for your **5th grade students** (approximately 10-11 years old). It's hands-on and brains-on! It's fun! It's **FREE!**

Students in New Mexico, U.S.A. will become high tech pen pals with students in another part of the U.S.A. or world. Each class will follow the RiverXchange curriculum to learn about major water resources issues relating to their **local river**. Students will share what they are learning via a private wiki website once or twice per month throughout the school year, from approximately October 1-May 31. All participating classes are to take their students on a field trip to their local river or tributary.

The program will improve your students' confidence and skills in many areas:

Communication  
Writing  
Math  
Science

Organization  
Geography  
History  
Computer technology

- ✓ We will match a New Mexico class with a partner class.
- ✓ We will provide on-line training to carry out the curriculum.
- ✓ We will provide on-going technical support, as requested.

**Participation is limited!**

**For more information, visit our website: [www.waterfestnm.com](http://www.waterfestnm.com).**
